

9 OUT OF 10 ORGANIZATIONS HAVE EXPERIENCED A BREACH WITHIN THE PAST 2 YEARS.

AND OVER 70% OF SECURITY BREACHES ORIGINATE AT THE ENDPOINT.

SESSIONGUARDIAN IS THE NEW STANDARD FOR COMPLIANCE-REGULATED DATA PROTECTION.

- Know that each remote user is complying with your select security protocols from log on to log off
- Lock down your compliance-regulated data without limiting access for your authorized professionals
- Block unauthorized administrators from accessing PII data with continuous identity verification
- Seamlessly integrate custom security protocols into your existing virtualization environment
- Get unmatched protection against PII theft and damaged reputation
- Simplify compliance regulations and create an ironclad audit trail

Breaches can cost organizations millions of dollars in fines¹, and even more in damaged reputation. Don't be a statistic—get the first and only software that locks down your PII data and mitigates data theft for good. Learn more today.
